## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Motiduki et al. (US 5757110).

Regarding claim 1, Motiduki discloses an insulating plug for a discharge lamp device with a body having a front end portion and a rear end portion, and arc tube fixedly held at the front end portion, a lamp-side connector at the rear end portion with the body made from a glass fiber reinforced plastic.

Regarding claim 3, Motiduki discloses the discharge lamp device provided with an insulating plug.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Motiduki et al. (US 5757110).

Art Unit: 2879

Motiduki discloses all of the above claim limitations but fails to clearly point out the plastic including from 20 weight % to 80 weight % glass fibers contained in a polyphenylene sulfide resin.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to select the most appropriate synthetic resin material, since it would be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use.
